J - please never hesitate to request assistance from me. I will always be sure to work closely with the OSCs in my group to be sure they work quickly and cooperatively with the Department. I also commit to track down what I can from other folks and the OSCs that do not work for me. Take care.

Thanks Jake. It is my understanding that an OSC (Dennis Matlock) is assigned. I will of course look into this to be sure that not only was it assigned that something is happening. Please reach out again if you do not hear shortly.

Subject: Paden City

Mike,

Since WVDEP has contacted EPA last year around 8/30/17 the situation at Paden City has deteriorated somewhat. EPA asked for WVDEP's permission to do a RSE, but I believe it was never done because data at that time did not support the action. However, since then there has been data that indicates levels of PCE in the finished water at Paden City's public water supply have exceeded MCLs and are trending higher. Bill Huggins, WVDEP Project Manager, has been in contact with the Public Works Director, Josh Billiter, who has informed Bill that they have tried a variety of fixes, within their means, to remedy the exceedances. They have been unsuccessful. A violation may occur if another quarterly sample comes in above MCLs. If this happens a public notice would be issued. WVDEP would like to request a RSE to

assess the situation and possibly perform an interim or TCRA to identify and/or mitigate possible sources.

Thank you for your consideration on this matter.
